

Request for Proposal: Quileute Marina Improvement Plan (CERB Planning Grant)

Issue Date: April 3rd, 2026

Due Date: April 28th, 2026

Questions and Answers

This document contains questions received by the Quileute Tribe in response to the RFP for the Quileute Marina Improvement Plan. Below are the Quileute Tribe's responses to the questions received by interested bidders.

Q&A (As of April 10th, 2026)

- 1) I saw your ad in the DJC for Marina improvements and followed the link. It appears the document is missing appendixes. Please advise. **RFPs are listed on our home page under Current Requests for Proposals. Click on the link to each individual appendix.**
- 2) As I see it, our role would be to contract an architectural firm who could provide marine engineering and design of a harbor master's office and also contract a general contractor? **There is no funding currently for construction. This is a planning effort with some engineering assessment and preliminary design recommendations, economic feasibility and strategic priorities, and cost estimates following CERB minimum planning requirements.**
- 3) For the page limit, do cover page, cover letter, resumes, and proof of insurance coverage sample COI count towards the 10-page limit? **No, the cover page, cover letter, resumes, and insurance do not count towards the 10-page limit.**
- 4) Will there be a site visit? **We do not currently have a site visit scheduled. An Appendix D- Site Overview, has been added to the list of RFP documents on our homepage at <https://quileutetribe.com/> to give visual understanding of the various marina components and areas of concern that are expected to be addressed through the Marina Improvement Plan.**
- 5) If this a construction project? **No, see response to question #2 above.**
